CONTENTS

Special Issue
2nd St. Petersburg Workshop on Simulation

Edited by V.B. Melas

Volume 85, Numbers 1–2

Foreword 1

Preface 3

Asymptotic complexity of Monte Carlo methods for solving linear systems *D.L. Danilov, S.M. Ermakov and J.H. Halton* 5

Optimal design of experiments with simulation models of nearly saturated queues *R.C.H. Cheng, J.P.C. Kleijnen and V.B. Melas* 19

The systematic error in the generations method for a kernel of mixed sign *Y.N. Kashtanov* 27

Multiple comparisons with the best using common random numbers for steady-state simulations *M.K. Nakayama* 37

Optimal designs for a one-way layout with covariates *R. Schwabe* 49

Efficiency and exponential models in a variance-reduction technique for dichotomous response variables *E. Vegas, J. del Castillo and J. Ocaña* 61

Generalized spacings of order statistics from extended sample *M. Ahsanullah and V.B. Nevzorov* 75

Generalized order statistics from exponential distribution *M. Ahsanullah* 85

Optimization of statistical sample sizes in simulation *A. Andronov and Y. Merkuryev* 93

An algorithmic construction of optimal minimax designs for heteroscedastic linear models *L.D. Brown and W.K. Wong* 103

Simple efficient estimation for the three-parameter gamma distribution *N. Balakrishnan and J. Wang* 115

Simulating the maximum of a random walk *K.B. Ensor and P.W. Glynn* 127

Block records and maxima of the increments of the Wiener process *G. Haiman* 137

Rounding probabilities: maximum probability and minimum complexity multipliers *M. Happacher and F. Pukelsheim* 145

Variance reduction by means of deterministic computation: collision estimate *S. Heinrich* 159

(contents continued)

Markov chain Monte Carlo and Rao–Blackwellization
I.W. McKeague and W. Wefelmeyer 171
Non-Poisson particle systems and Boltzmann equations *V. Nekrutkin* 183
Convergence of discrete-stochastic numerical procedures with independent or weakly dependent estimators at grid nodes
E.V. Shkarupa and A.V. Voytishek 199
Adaptive control of stochastic calculating processes
D.G. Arsenjev, V.M. Ivanov and O.Yu. Kul'chitsky 213
Author Index Volume 85 227
